Government of India has launched a new scheme "Study in India." An online admission portal through which an aspiring student would be able to get considered for admission by more than 150 institutions with one single application has been put in place.

The criteria for admission would be scores obtained in the 12th class examination/SAT scores. Fee waivers ranging from 100% to 25% will be provided based on merit and preferences to students. The programme will be implemented by EdCIL (India) Limited, a Public Sector Enterprise under Ministry of Human Resource Development of the Government of India.
